Experiment 5-A

Reports for the Vehicle Service Request Application

Aim

To design and build a complete suite of Reports in Zoho Creator for the Vehicle Service Request application, demonstrating all nine Report Types: List, Spreadsheet, Kanban, Calendar, Map, Timeline, Pivot Table, Chart and Summary View.

Procedure

1. Owners submit service requests through the Service_Request_Form.
2. The front office monitors incoming requests using All_Service_Requests_List and Service_Activity_Timeline.
3. Technicians track progress visually using Service_Status_Kanban.
4. Technicians use Service_Schedule_Calendar to plan bay allocation for each day's scheduled vehicles.
5. The pickup/drop team uses Owner_Location_Map to plan efficient collection and delivery routes.
6. The manager reviews VehicleType_By_ServiceType_Pivot and ServiceType_Distribution_Chart to plan staffing and parts inventory.
7. Daily, the front office updates repair progress in bulk with Service_Requests_Spreadsheet, while the manager uses VehicleType_Wise_Summary for maintenance-reminder campaigns.

Reports Used

Report Type	Report Name	Purpose and Key Configuration
List View	All_Service_Requests_List	Flat searchable list; columns Owner Name, Registration No., Vehicle Type, Service Type, Status; sorted by Preferred Service Date ascending
Spreadsheet View	Service_Requests_Spreadsheet	Bulk editing; only Diagnosis, Repair and Ready for Pickup status editable; grouped by Vehicle Type
Kanban View	Service_Status_Kanban	Cards grouped by Status: Requested / In Diagnosis / In Repair / Ready for Pickup / Delivered
Calendar View	Service_Schedule_Calendar	Based on Preferred_Service_Date; vehicles per day; click a date to drill down
Map View	Owner_Location_Map	Pickup_Address (geocoded); pins coloured by Service Type
Timeline View	Service_Activity_Timeline	Based on Service_Request_Submitted_On; grouped by week to show demand trend
Pivot Table	VehicleType_By_ServiceType_Pivot	Rows Vehicle_Type, columns Service_Type, values count of requests; blanks shown as zero
Chart View	ServiceType_Distribution_Chart	Pie chart of requests per Service_Type; auto-refresh on new submission
Summary View	VehicleType_Wise_Summary	Grouped by Vehicle_Type; count of requests and average Odometer_Reading; zero-count types still listed

Validation & Configuration Rules

- List View sorted by Preferred Service Date ascending so nearest dates appear first.
- Spreadsheet View edit rights restricted to the Front Office role; all other columns locked.

- Kanban card movement updates the Status field automatically with a timestamp.
- Calendar View highlights only the current and next day's schedule.
- Map View requires the Pickup Address field to be geocode-enabled.
- Timeline View data refreshes daily.

Output Screenshots

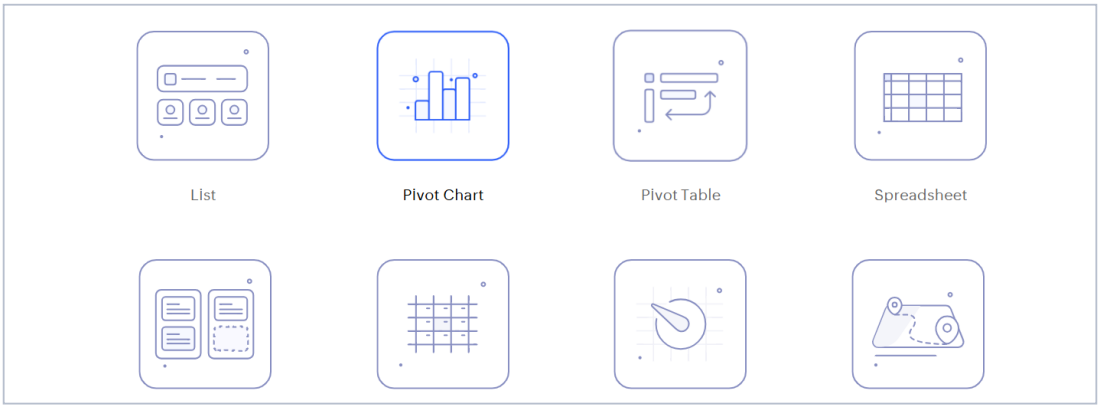

Figure 1: Report type selector in Zoho Creator's Report Builder.

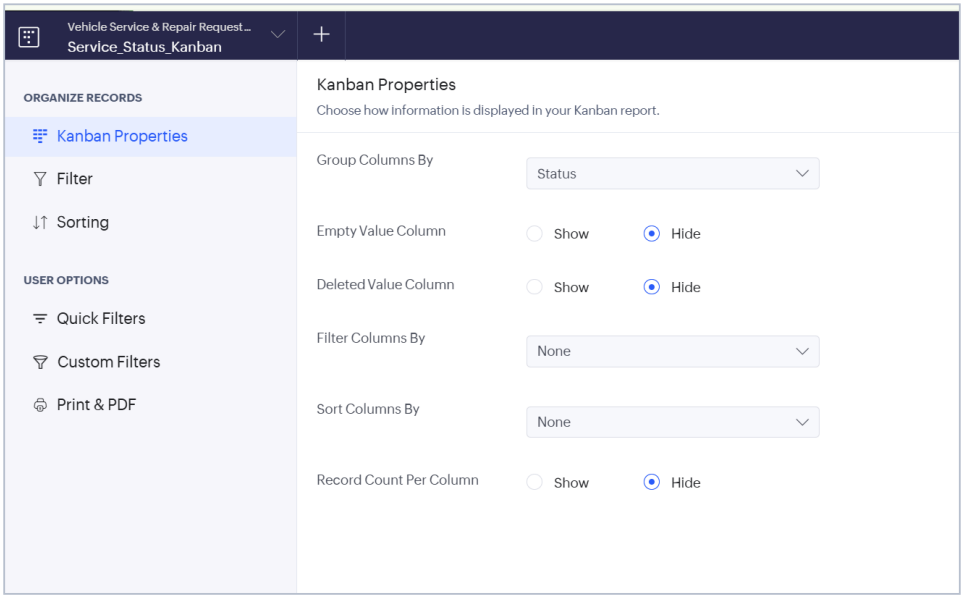

Figure 2: Kanban Properties of Service_Status_Kanban: columns grouped by Status.

Sample Data Used by the Reports

Sample data for this lab record. Values shown are the expected output for these sample records.

Owner	Registration No.	Vehicle Type	Service Type	Odometer (km)	Status
Ramesh Kannan	TN 34 AB 5678	Hatchback	Breakdown Repair	45,230	In Repair
Priya Sharma	TN 38 CD 1234	Sedan	Routine Service	28,110	Requested
Arun Prakash	TN 09 EF 9087	SUV	Accident Repair	61,890	In Diagnosis
Meena Devi	TN 01 GH 4410	Hatchback	Routine Service	19,640	Ready for Pickup
Karthik Raja	TN 66 JK 2201	Sedan	Breakdown Repair	52,300	Delivered

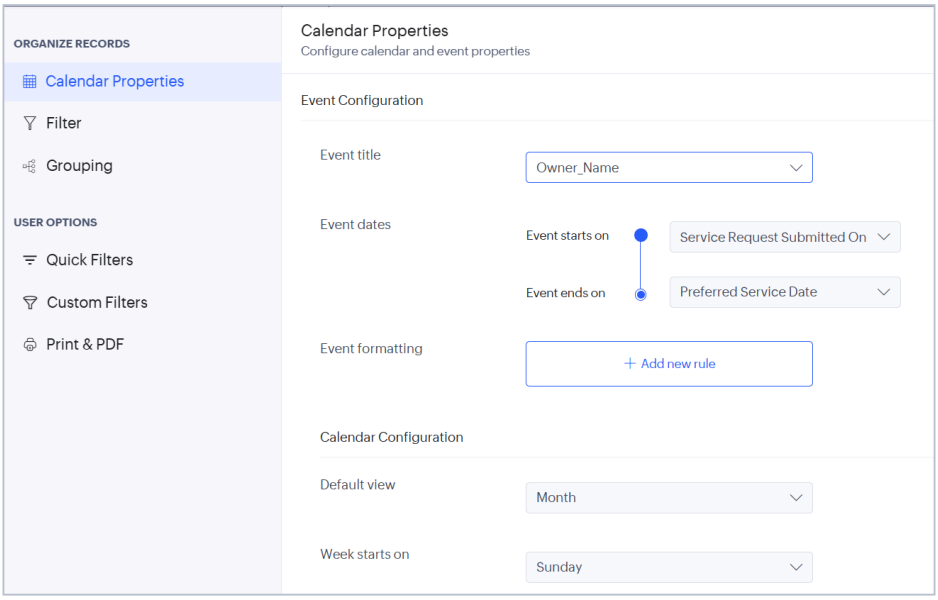

Figure 3: Calendar Properties of Service_Schedule_Calendar: Owner_Name as event title, Submitted On to Preferred Service Date.

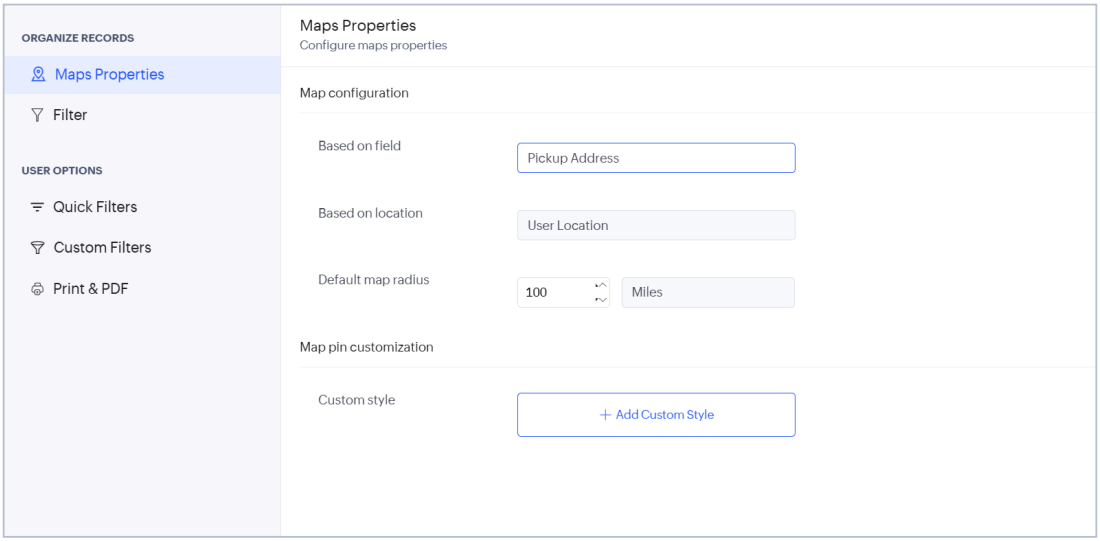

Figure 4: Maps Properties of Owner_Location_Map: based on the Pickup Address field.

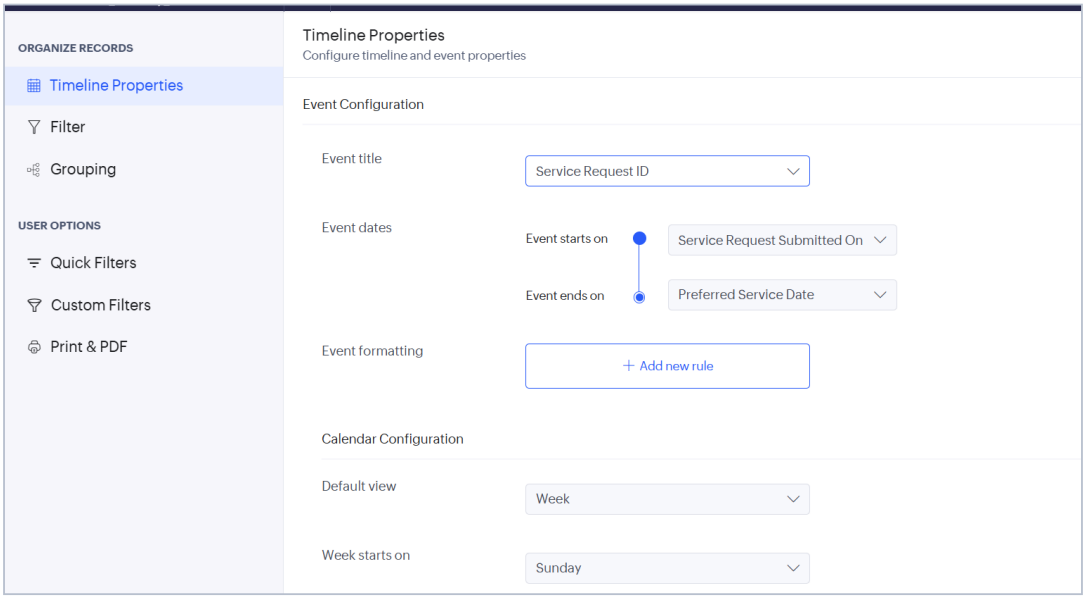

Figure 5: Timeline Properties of Service_Activity_Timeline: Service Request ID as title, Submitted On to Preferred Service Date, default Week view.

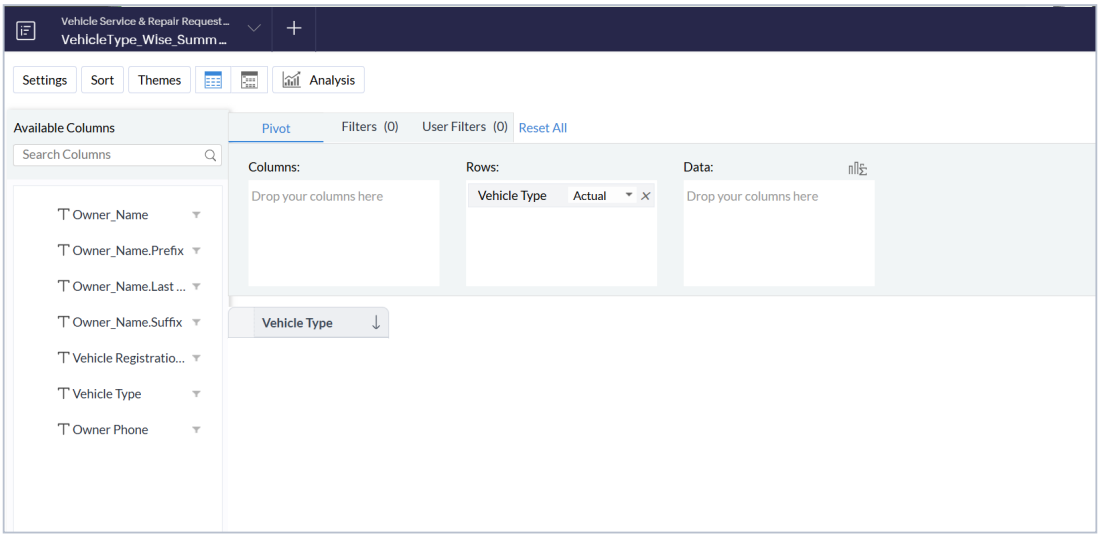

Figure 6: Summary view builder: VehicleType_Wise_Summary with Vehicle Type grouped in rows.

Expected Pivot Table: VehicleType_By_ServiceType_Pivot

Vehicle Type	Routine Service	Breakdown Repair	Accident Repair	Total
Hatchback	1	1	0	2
Sedan	1	1	0	2
SUV	0	0	1	1
Two-Wheeler	0	0	0	0

Blank cells are displayed as zero, as configured.

Expected Summary: VehicleType_Wise_Summary

Vehicle Type	Count of Requests	Average Odometer (km)
Hatchback	2	32,435
Sedan	2	40,205
SUV	1	61,890
Two-Wheeler	0	0

Expected Chart and Kanban Counts

ServiceType_Distribution_Chart (pie)	Requests	Kanban column (Status)	Cards
Routine Service	2	Requested	1
Breakdown Repair	2	In Diagnosis	1
Accident Repair	1	In Repair	1
		Ready for Pickup	1
		Delivered	1

Result

A suite of nine Reports, one for each Report Type, was created on the Service_Request_Form in Zoho Creator, giving each stakeholder a purpose-built view of service request data.
