Experiment 5-B

Command Center Page Using Page Builder Elements

Aim

To design and build a single internal Command Center Page in Zoho Creator for the Vehicle Service Request application, demonstrating all eleven Page Builder elements (Panel, Board, Chart, Gauge, Search, Form, Report, Snippets, Button, Widgets and Viewer).

Procedure

The Workflow Summary of the use case is used as the procedure.

1. Staff open Service_Command_Center_Page and see the Daily Bay Utilization Gauge and ServiceType Distribution Chart.
2. Staff use the Vehicle/Owner Search Bar to find a specific vehicle by registration number, owner name or request ID.
3. Technicians drag service cards across the Service Status Board as diagnosis and repair proceed.
4. Staff click the Send Ready-for-Pickup Button to notify owners whose vehicles are ready.
5. For a walk-in vehicle, staff use the Quick Walk-in Service Form directly from the command center.
6. The manager scrolls to the Full Service Requests Report for deeper analysis or export.
7. For owner queries, staff refer to the Service Policy Estimate Snippet, check the Spare Parts Stock Widget and open the Insurance Damage Photo Viewer.

Page Elements Used

Element	Element Name	Role on the Page
Panel	Command_Center_Main_Panel	Outer container; role-based visibility for front office and manager
Board	Service_Status_Board	Kanban columns mapped to Status; drag to update the record
Chart	ServiceType_Distribution_Chart_Widget	Pie chart of requests per service type; auto-refresh
Gauge	Daily_Bay_Utilization_Gauge	Today's bay occupancy (e.g. 6 of 8); colour changes near full
Search	Vehicle_Owner_Search_Bar	Searches Registration Number, Owner Name, Request ID
Form	Quick_Walkin_Service_Form	Embedded Service_Request_Form with identical validation
Report	Full_Service_Requests_Report	Full report with manager-only export to Excel
Snippets	Service_Policy_Estimate_Snippet	Reusable policy and estimate-approval text
Button	Send_ReadyForPickup_Button	Triggers notification workflow for Ready for Pickup vehicles only
Widgets	Technician_And_SparePartsStock_Widgets	Technician availability and spare-parts stock
Viewer	Insurance_Damage_Photo_Viewer	Inline viewer for insurance copy and damage photos

Page Layout

- **Overview Strip:** Daily Bay Utilization Gauge, ServiceType Distribution Chart, Vehicle/Owner Search Bar

- **Processing Workspace:** Send Ready-for-Pickup Button, Service Status Board
- **Detailed Data:** Full Service Requests Report
- **Sidebar:** Service Policy Estimate Snippet, Insurance Damage Photo Viewer, Quick Walk-in Service Form
- **Operations Strip:** Technician Availability and Spare Parts Stock Widgets

Output Screenshots

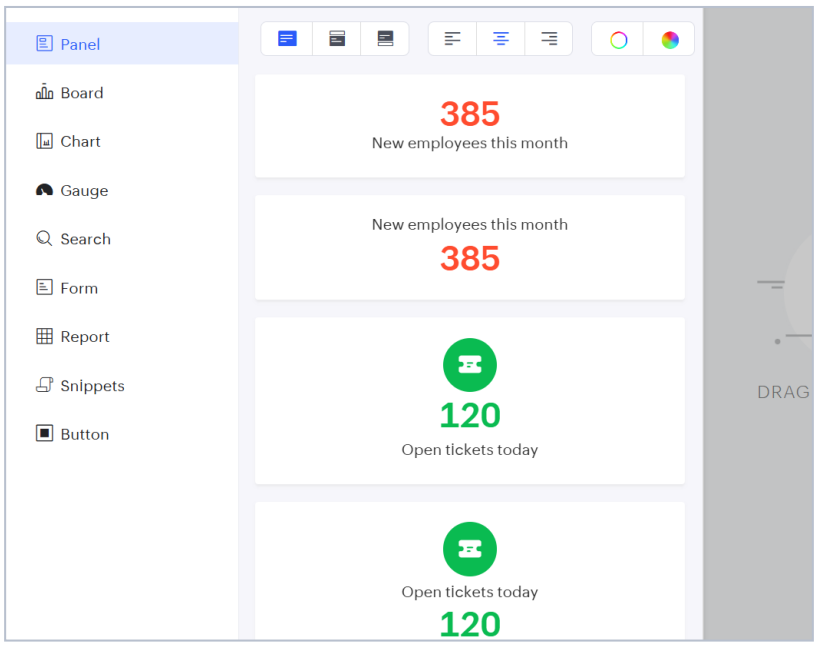

Figure 1: Page Builder (Service_Command_Center): Panel element options.

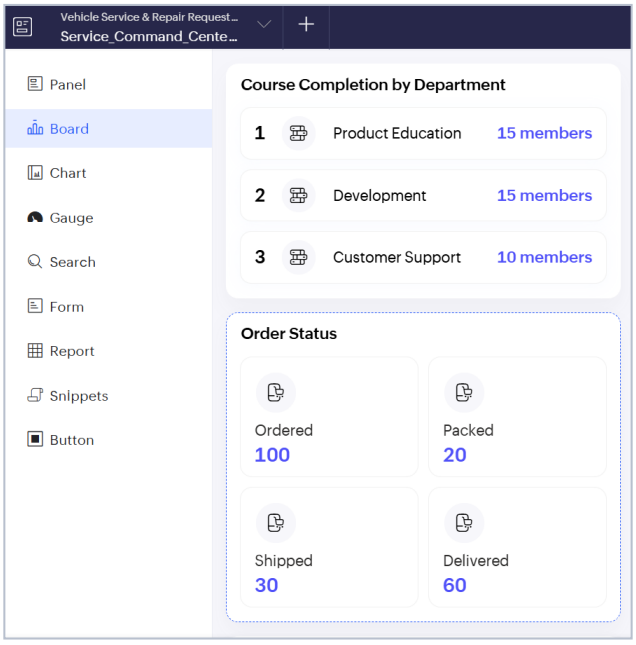

Figure 2: Page Builder: Board element options.

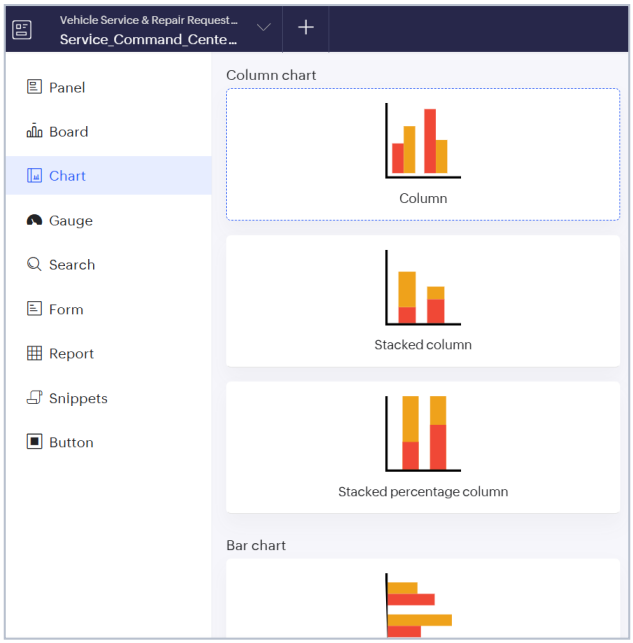

Figure 3: Page Builder: Chart element options.

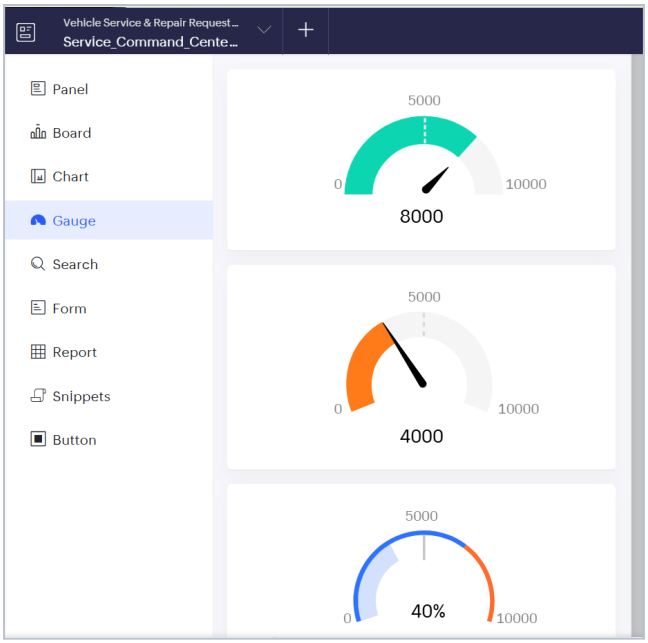

Figure 4: Page Builder: Gauge element options.

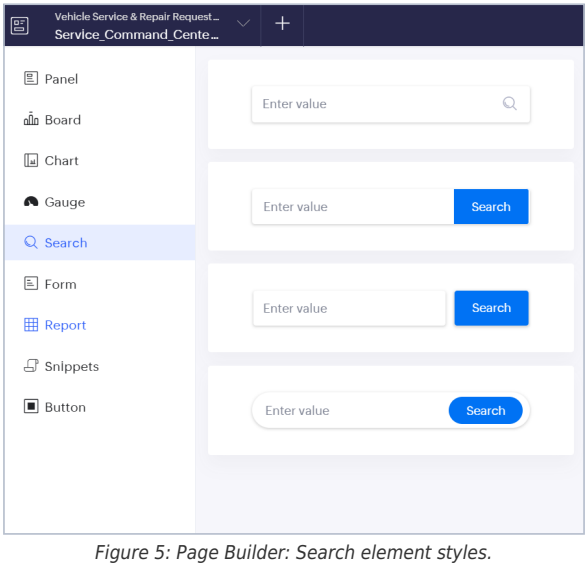

Figure 5: Page Builder: Search element styles.

Sample Live Data on the Page

Sample data for this lab record. Values shown are the expected output for these sample records.

Element	Value Shown for the Sample Data
Daily_Bay_Utilization_Gauge	6 of 8 bays occupied (75%); colour moves from green towards red near full
ServiceType_Distribution_Chart_Widget	Routine Service 2, Breakdown Repair 2, Accident Repair 1
Service_Status_Board	Requested 1, In Diagnosis 1, In Repair 1, Ready for Pickup 1, Delivered 1
Panel (summary)	5 total requests; average estimated cost ₹4,840
Full_Service_Requests_Report	5 records; export to Excel visible to manager accounts only

Element Behaviour Tests

Element	Test	Expected Result
Search	Enter TN 34 AB 5678	Returns the request of Ramesh Kannan
Board	Drag a card from In Repair to Ready for Pickup	Status field of the record updates instantly
Button	Click Send Ready-for-Pickup	Only owners with Ready for Pickup status are notified (1 of 5)
Form	Log a walk-in vehicle	Same validations as Service_Request_Form; new card appears on the board
Report	Open as front office / as manager	Export option appears for the manager only
Snippets	Edit the policy text once	Change appears wherever the snippet is reused
Widgets	Open technician and spare-parts widgets	Technician availability and current stock levels are shown
Viewer	Upload a newer insurance copy	Latest file is displayed without changing any link
Panel	Open as a technician	Page not accessible; only front office and manager roles allowed

Result

A single internal Service_Command_Center_Page was built in Zoho Creator using all eleven Page Builder elements, giving staff one workspace to monitor, search, process and reference service requests.
