Experiment 8

User Management and Role-Based Access Control in Zoho Creator

Aim

To implement User Management and Role-Based Access Control in Zoho Creator to manage users, assign roles and control access to the features and data of the Vehicle Service application based on the permissions granted to each role.

Procedure

1. Log in to Zoho Creator using the administrator (Super Admin) account.
2. Open the Users page from the Manage section in the left navigation pane.
3. Click Add User and enter the email addresses of the users to be invited. An invitation is sent to each user.
4. Check the Users list and confirm that each user appears with the correct name, email address and status (Active or Pending).
5. Open the options menu (...) beside a user to view the available actions: Resend Invitation, Add to Application, Make as Admin, Deactivate, Edit Name and Delete.
6. Use Deactivate on a user who should no longer have access and confirm the status changes to Inactive.
7. Use Add to Application to grant a user access to the Vehicle Service application by selecting the application, role and permission.
8. Open the user's details panel and verify the application, role and permission assigned.

Roles Planned for the Vehicle Service Application

Role	Who	Access
Service Manager	Service center manager	Full access; reports, export to Excel, approvals, command center
Front Office	Reception staff	Add and edit service requests; spreadsheet status edits; command center
Technician	Mechanics	View assigned requests; update repair status on Kanban
Pickup/Drop Team	Drivers	View pickup addresses and map report only
Vehicle Owner (Portal User)	Customers	Submit a request and view own records only

Planned Users (Sample)

User	Email (sample)	Role	Permission
Service manager	manager@example.com	Service Manager	Full access
Reception staff	frontoffice@example.com	Front Office	Add / edit
Mechanic	technician@example.com	Technician	Status update
Driver	pickup@example.com	Pickup/Drop Team	Read (map report)

Process Diagram

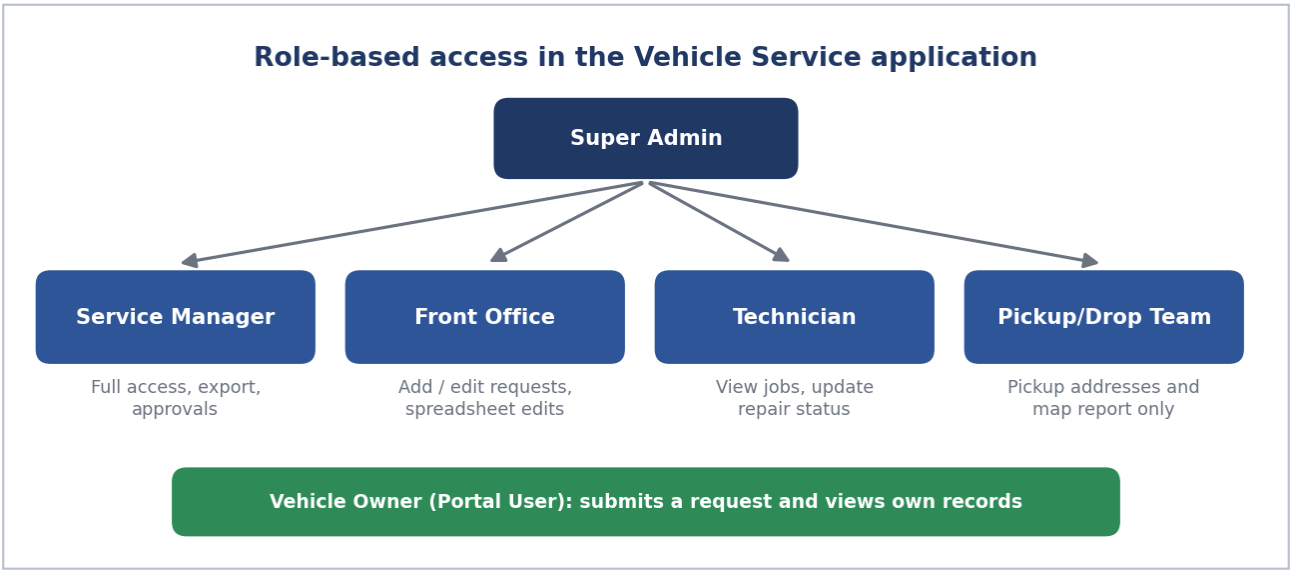

Figure 8.1: Diagram of the roles planned for the application (illustrative diagram, not a screenshot).

Role Tests

Login As	Action	Expected Result
Service Manager	Open Full_Service_Requests_Report and export	Allowed
Front Office	Edit status in the spreadsheet report	Allowed; other columns locked
Technician	Delete a request	Not allowed
Pickup/Drop Team	Open Service_Request_Form	Not available; map report only
Deactivated user	Log in	Access denied; status shows Inactive

Result

User Management and Role-Based Access Control were implemented in Zoho Creator for the Vehicle Service application.
